

# **BALL IN A MAZE**

## **TASK 1**

Create a GIF animation using CSS to depict a ball moving through a maze from start to finish (It can be a very simple maze, that's okay). You are free to use any image of a ball.

## **TASK 2**

With the created animation, add an option to start, resume and stop the ball during its movement. Start should begin the ball from the beginning, Resume continues the ball movement, and stop the ball movement until resumed.
